

## **SOLID GALVANISED WIRE**

Solid Galvanised Wire is ideal for long permanent electric fencing systems. The heavy galvanised high tensile strength wire is used where a long life and durable electric fence is required. It's ideal for the larger farm and game electric fencing systems.

## **Features:**

- Heavy duty high tensile strength wire
- Long life expectancy on a fence
- Larger diameters offer lower electrical resistance
- Available in light galvanised for inland use and heavy galvanised for coastal areas

## **Specifications:**

Material High tensile steel

Construction Solid

Tensile breaking strength 2.0mm: ~320kgs

2.24mm: ~400kgs

Resistance 2.0mm: 60 Ohms/km

2.24mm 500hms/km

Finish Heavy galvanised

Light galvanised
