

SHIELD INSULATOR

The Shield insulator is used with square tube brackets, and square or round fencing posts.

Features:

- Large electrical tracking distance to reduce arcing in areas where there is pollution and salt build-up
- Feed through and slotted for maximum security or quicker wire placement
- Self Tapper Hooks are used to fasten the Shield insulator to the bracket or post and is available in two sizes
- Easy to change and maintain

Specifications:

Material	UV stabilised plastic
Mounting	6.2mm Hole Diameter
Colour	Black White
Operating temperature	-40 to 80°C
Operating voltage	0 - 12KV
Recycling	SPI 2
